Professional Summary

Software Engineer with 3+ years of experience building scalable backend systems, microservices, and distributed applications in fintech and insurance. Strong in Go, Node.js, Java, REST APIs, Kafka, MySQL, Redis, and production reliability. Delivered high-traffic integrations and event-driven platforms with measurable latency, uptime, and throughput improvements.

Technical Skills

Programming Languages: Go, Java, JavaScript, TypeScript, C++, SQL

Backend: Node.js, Express, REST APIs, Microservices, Distributed Systems, Event-Driven Architecture

Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis

Messaging: Apache Kafka

Frontend: Angular, React.js, Next.js

DevOps & Observability: Git, CI/CD, ArgoCD, Kubernetes, Kibana, JIRA, Postman

Security: JWT, OAuth2

Professional Experience

Software Engineer Paytm Noida September 2025 – Present

- Owned end-to-end solutioning and development of AU Small Finance Bank (AU SFB) integration; delivered production release and coordinated with BFF, operations engineering, and frontend teams for rollout
- Led solutioning and development of RBL Account Aggregator integration; supported credit card growth with zero downtime and high availability during production launch
- Built microservices for credit card platform processing 100,000+ applications per month; developed REST APIs and asynchronous workers in Go and Node.js, reducing processing time by 30%
- Implemented Kafka-based event-driven architecture processing 50,000+ events per day with 99.9% uptime; optimized MySQL and Redis, improving latency by 40%
- Delivered HDFC credit card integration: application submission, consent, income verification (Perfios), OTP and demographic flows; supported dual bank journeys (Salesforce and legacy)
- Enabled SBI credit card flows: application ingestion and handoff, post-approval card inquiry and OTP, dispatch tracking, and appointment booking for branch visits
- Built Axis Bank background workers for status synchronization, KYC polling, retries for failed updates, and compliance data purge; 500+ jobs per batch with parallel execution

Software Development Engineer I InsuranceDekho Gurgaon March 2025 – August 2025

- Integrated ICICI Elevate and Care Ultimate insurance plans, reducing time to market by 35%
- Developed premium calculators with 20+ add-ons and eligibility modules using Node.js and MongoDB
- Improved quote parsing and rendering performance by 20% for 50,000+ daily quotes

Junior Software Developer Akal Information Systems New Delhi July 2023 – February 2025

- Built payroll and reporting modules used in large-scale government contracts
- Integrated Angular frontend with Node.js backend services, reducing payroll cycle time by 25%
- Implemented Redis caching to reduce API response time by 40%

Projects

Doodle Keep – Angular, Node.js, MongoDB [Project Link](#)

Portfolio Website – Angular [Project Link](#)

Education

Bachelor of Technology, Computer Science GL Bajaj Institute of Technology and Management 2019 – 2023
CGPA: 8.67

Achievements

5-Star C++ and Algorithms (HackerRank) — 500+ data structures and algorithms problems solved
